FUTURE OF TTP -DEVELOPMENTAL TEAM TRAINING PROGRAMME (DTTP)

TTP currently encompasses primarily health science students however the problems facing the development of our societies and communities are multifaceted. To further strengthen the success of TTP, it will need a developmental team comprising graduating students from the faculties of Business and Economics, Technology, Agriculture, Education, Law, in addition to the health sciences. They will engage themselves in developmental works in the areas of health education, agriculture, technology, cottage industries, and good governance and will be assigned to a local community (woreda) for two months. Therefore, DTTP enables students to work in a team with different professionals to make a difference in development.
